General Information

The RSS IP Lite family of products provide an IP door entry solution for a wide range of requirements from a simple one entrance one monitor system to multiple entrances calling multiple apartments with multiple monitors.(All of the IP Lite range of products are PoE. In conjunction with the 4 and 8 way PoE switches, systems can be built, programmed and commissioned with ease)

See our separate data sheets for specific information on each of the products.

Visit our website: raytelsecurity.com for updates and additions to the product range.
