- **Keypad for coded access**
- **Built in RFID reader**
- **DDA audio annunciations at panel**
- **Local connections for lock and exit button**
- **IP65 Ingress rating, IK08 Impact rating**

Brand

Raytel Security Systems Limited

General Information

This is a multi function door entry panel for use in conjunction with the RSS IP Lite family of products.

The entrance panel incorporates a 5" TFT touch display which provides access to the user directory, direct access keypad and an address book function (if configured)

Installer and Manager modes are password protected. Installer mode provides access to all aspects of the system for configuration and initial setup. Manager mode enables the management of keycodes, proximity tokens and the address book.

Audio/visual annunciations are made at the panel to indicate a dwelling is being called, that conversation is established and the lock is released.
