Brand

General Information

The 13A4 Entrance Panel electronics are fully programmable via the keypad and display. An integral searchable directory allows for up to 2 names per internal unit.

Up to 1,000 individual lock codes can be enabled via the keypad to enable coded entry. The coded entry can also be time constrained of required.

Full duplex speech is provided with volume level controls for audio in and audio out.

The Entrance Panel can be used to programme the identity of associated handsets or monitors for use with the Entrance Panel.

The Entrance Panel has 3 numbering configurations to enable natural, 4 digit and 8 digit numbering of dwellings.

The keypad and display are illuminated.
